EmpID:289243

I. Padma Kireeti

Intermediate Project – 1 (Git and GitHub)

Recipe sharing platform(Using GitHub Issues)

Objective: Build a recipe-sharing web platform where users can submit, rate and share recipes.

Skills: Full-Stack Development(Node.js ,Express, Mongo DB, etc.)

GitHub Concepts: GitHub Issues for managing user-submitted recipes and feedback, collaborating via pull requests, Creating milestones for feature completion.

Step-1:Create a project available for every user like monkeytype.com

Any issues they will add those issues and we can assign to a developer and after resolving those issues he will send a pull request and we review it and merge with the main code.

Another approach:

We can add a collaborator into our project and he will fork the project and any issues are present he will edit and he will create a pull request and we can review it and accept and merge the changes into main code.
